RE New Concrete Rubble Stockpile - Concurrence

Dear Mr Legare

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed your December 18, 2001 letter proposing a new location for stockpiling recycled concrete rubble. The new location is to be located within the former Protected Area fence site immediately east of the current Building 762/762A walkway extending approximately 500 feet to the east. Based on the information provided with your letter this site meets the minimum criteria identified in Section 7.1 of the Concrete Recycling RSOP. As such, we hereby concur with your proposal for the new stockpile site.

Due to the increased slope (more than 4 %) this stockpile may not extend farther to the east than currently indicated. In addition, due to the presence of loose gravel on the surface in this area, specific care must be taken to control surface water runoff as required.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H Gunderson
RFCA Project Coordinator
